February 2026  
FOI\_7711

The following information was requested on 06 February 2026 and clarified on 10 February 2026:

[On the 06 February 2026, you requested]

*I am writing to request information under the **Freedom of Information Act 2000**.*

### **Scope of request**

*Please provide data on **clinical negligence claims relating to maternity services at Oxford University Hospitals Trust and University Hospitals Sussex**, covering **EACH** of the **last ten completed financial years**.*

### **Data requested**

*For each of the financial years listed above, please provide the following information:*

- 1. **Total number of completed claims each year.***
- 2. **Total damages paid** (including damages and claimant legal costs)*
- 3. **Further broken down by the primary injury category**, as recorded by NHS*

*Resolution, to include:*

- o Stillbirth*
- o Neonatal death*
- o Maternal death*
- o Brain injury*
- o Other physical injury*

*Where claims fall into more than one category, please allocate them according to NHS Resolution's standard primary injury classification.*

### **Format**

*Please if possible provide the information in an **electronic spreadsheet format** (Excel .xlsx or CSV), with:*

- One row per **trust per financial year per injury category**, and*
- Clear column headings (e.g. financial year, trust name, injury category, total paid).*

*If any of the requested information is **not held**, please specify which elements are unavailable and why.*

### **Clarifications and cost limit**

*If this request risks exceeding the **section 12 cost limit**, I would be grateful if you could:*

- Advise which part of the request presents difficulty, and*
- Suggest a refinement that would allow disclosure within the limit.*

### **Public interest**

*This information is requested in the public interest to support reporting on maternity safety, litigation costs, and accountability within NHS services.*

[On the 10 February 2026, we sought for clarification with]

*Thank you for your request for information.*

*Please could you confirm whether you would like us to include the specialty “Neonatology” alongside **Obstetrics** in the data, or whether you would prefer the data **excluding Neonatology**.*

[On the 10 February 2026, you replied with]

*Please include it.*

*Thanks*

## **Our Response**

Please find attached the requested information. Please note we only hold information for England and not for the rest of the UK.

**NB:** We have recently changed the way we report on our FOIs to align better with our published documents. Streamlining our reporting on FOIs with our annual published reports may mean a variation in snapshot dates. This means this data may not align with previous similar requests and it may not be possible for you to compare this information with a previous request. For further information, please refer to [Guidance-note-Understanding-NHS-Resolution-data-updated](#)

Due to the way in which data is extracted, it is also possible that the same claim may appear more than once in a dataset, across different year groups e.g. where the case has been closed (as nil damages payment), challenged, reopened, and closed again at conclusion.

Claims notified/received in any given year will often relate to incidents that have occurred many years prior. Due to the nature of clinical negligence claims and the level of investigation needed to bring them to a resolution, claims received and notified in a specific year may take years to settle and close. **They are not guaranteed to be settled and closed in the same year.** As such, there will be a time gap between incident and claim closure.

The data shows variation in numbers of claims closed per year and costs attributed to those claims. This is a reflection of the nature of individual claims received and resolved by NHS Resolution, which can vary significantly. As such, these fluctuations cannot be interpreted as trends.

We have provided data on CNST cases only. For further information about our CNST scheme please visit our website [Clinical Negligence Scheme for Trusts - NHS Resolution](#).

Please find attached the following tables:

**Table 1 shows:** Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years ‘**2015/16**’ and ‘**2024/25**’ with a damages

payment, where the Specialty is '**Obstetrics**' or '**Neonatology**' for **Oxford University Hospitals NHS Foundation Trust** and **University Hospitals Sussex NHS Foundation Trust**. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

**Table 2 shows:** Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '**2015/16**' and '**2024/25**' with a damages payment, where the Specialty is '**Obstetrics**' or '**Neonatology**' for **Oxford University Hospitals NHS Foundation Trust** and **University Hospitals Sussex NHS Foundation Trust**. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by **Primary Injury**.

**Table 3 shows:** Number and Cost of CNST Claims Closed between financial years '**2015/16**' and '**2024/25**' with **NIL** damages paid, where the Specialty is '**Obstetrics**' or '**Neonatology**' for **Oxford University Hospitals NHS Foundation Trust** and **University Hospitals Sussex NHS Foundation Trust**.

**Table 4 shows:** Number and Cost of CNST Claims Closed between financial years '**2015/16**' and '**2024/25**' with **NIL** damages paid, where the Specialty is '**Obstetrics**' or '**Neonatology**' for **Oxford University Hospitals NHS Foundation Trust** and **University Hospitals Sussex NHS Foundation Trust**. Broken down by **Primary Injury**.

**Please note: the tables broken down by Trust should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.**

## **PPOs**

The information disclosed includes damages paid up to the end of the settlement year (in Periodical payment order (PPO) cases) and up to the end of the closure year in non-PPO cases.

PPOs are an agreement between the parties, to pay an initial lump sum and regular future payments (PPO damages) related to the injured party's ongoing needs, usually care for life i.e., a percentage of the full value of the claim is paid at the point of settlement (lump sum damages) with the balance paid at regular intervals over subsequent years. The information disclosed includes lump sum damages and any PPO damages paid up to the end of the year of settlement. It does not include PPO damages, which have been committed to but due to be paid after the settlement year.

## **Low Numbers**

Please note we have suppressed low figures as we believe that disclosure of information with this level of granularity is exempt under Section 40(2) by virtue of section 40(3A) (a) of the Freedom of Information Act 2000, where disclosure to a member of the public would contravene one or more of the data protection principles. The data protection principles are set out in Article 5 of the General Data Protection Regulation. We take the view that it would not be fair or lawful (given the sensitive and confidential nature of the information held) to disclose such information, and any disclosure would therefore contravene the first data protection principle.

In some instances, the low numbers of claims (fewer than 5) in each category, the likelihood exists that individuals who are the subject of this information may be identified either from this information alone, or in combination with other available information. In addition to this, as this information is considered to be sensitive personal data (the data subjects' medical condition); NHS Resolution believes it has a greater responsibility to protect those individuals' identities, as disclosure could potentially cause damage and/or distress to those involved.

Please refer to [Understanding NHS Resolution data guidance](#) for further details on how our Claims database is categorised.

Further to our obligations to provide advice and assistance, you may find it helpful to review the work of the [Getting It Right First Time team](#) with whom NHS Resolution has been working with to undertake in-depth analysis of our claims data. They have produced a number of [reports](#) from analysing our claims data which has been shared following approval of the confidentiality advisory group to the use of confidential patient information for this purpose.

## **This concludes our response to your request.**

If you are not satisfied with the service that you have received in response to your information request, it is open to you to make a complaint and request a formal review of our decisions. If you choose to do this, you should write to [Joanne Appleby](#), Deputy Data Protection Officer for NHS Resolution, within 28 days of your receipt of this reply. Reviews of decisions made in relation to information requests are carried out by a person who was not involved in the original decision-making about the request.

If you are not content with the outcome of your complaint, you may apply directly to the Information Commissioner for a review of the decision. Generally, the Information Commissioner will not make a decision unless you have exhausted the local complaints procedure. The address of the Information Commissioner's Office is:

Wycliffe House  
Water Lane  
Wilmslow  
Cheshire

SK9 5AF

## TABLE OF CONTENTS

**NB: Number of claims fewer than 5 (and any associated values, within the same row) are masked with a "#" (in accordance with Data Protection guidelines). Accordingly, some total values may also be approximated to prevent masked values to be deduced through reverse calculation.**

Table 1: Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2015/16' and '2024/25' with a damages payment, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement.

Table 2: Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2015/16' and '2024/25' with a damages payment, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Primary Injury.

Table 3: Number and Cost of CNST Claims Closed between financial years '2015/16' and '2024/25' with NIL damages paid, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust.

Table 4: Number and Cost of CNST Claims Closed between financial years '2015/16' and '2024/25' with NIL damages paid, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust. Broken down by Primary Injury.

*Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.*

**Table 2: Number and Cost of CNST Claims Closed (or settled with a periodical payment order) between financial years '2015/16' and '2024/25' with a damages payment, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust. The data includes the damages and legal costs paid up until the end of each relevant financial year of closure, or for PPO matters, year of settlement. Broken down by Primary Injury.**

*Please note: the tables broken down by Trusts should not be interpreted as a league table. Larger member organisations and those which provide more complex treatments may receive more claims than smaller organisations or those providing low risk care. Inevitably, different institutions face different levels of risk because of the variations in the nature and complexity of the procedures they perform. In some circumstances, volumes of reported cases may be impacted by multiple claims notified in relation to one cause of action.*

**Table 4: Number and Cost of CNST Claims Closed between financial years '2015/16' and '2024/25' with NIL damages paid, where the Specialty is 'Obstetrics' or 'Neonatology' for Oxford University Hospitals NHS Foundation Trust and University Hospitals Sussex NHS Foundation Trust. Broken down by Primary Injury.**
